

Social Media Impact

Misinformation Flow on Social Media

Progress Report 2

November 6, 2023

Sagar Nandeshwar (260920948)

Change in Project

The primary objective to study the information flow on social media platforms remains the same, however I am planning to avoid using ML models for graph generation or user prediction. ML models for graph and graph mining are highly complicated and request a lot of resources for computation and are very time consuming. Instead I will be focusing my study network framework and on generating random Graphs. Gradually, I will start implementing my proposed algorithm for information flow, conduct tests and experiments both for network framework and spread mechanism. I have also started collecting twitter data for the project.

New Deliverables Table

Developer	Due Date	Task	Points
Sagar Nandeshwar	Oct 27th, '23	Framework Implementation	2
Sagar Nandeshwar	Nov 6th, '23	Collecting Twitter Data	2
Sagar Nandeshwar	Nov 20th '23	Spread Mechanism Implementation	2
Sagar Nandeshwar	Dec 1th 23'	Run Experiments and Test	2
